### DEVELOPER EXPERIENCE

- [Church Hive](#) May 2023 - Present
  - Collaborated with a dynamic team as a Backend & DevOps Engineer developing an app that allows churches and people to connect.
  - Consulted with colleagues as the main point of contact for technical assistance.
  - Initiated deployment for the backend API on cloud servers, and the frontend on the Google Play store and Apple App store.
- [Dashello](#) Aug 2023 - Present
  - Innovative strategist for a startup organization working to develop solutions that will allow business owners to more efficiently analyze business processes.
  - Backend Engineer developing diverse and broad-range solutions to simplify systems and implement functions including major security implementations and handling data for organizations.
- **Freelance**
  - [YourQualityMassage.com](#)  
Designed, built, and deployed a website with competitive market positioning for a local, small business.
  - [WillisCanada.com](#)  
Developed and currently maintaining a website for a musical ministry personality. Special features include:
    - Events page that automatically organizes events by date
    - Guest book where people can write their experience with Willis Canada at their venue or church
    - Admin panel for independent maintenance
  - [ChurchHive.app](#)  
The Church Hive website is a website that serves multiple purposes for the Church Hive project:
    - Advertises and informs people on Church Hive
    - People can access the Church Hive app directly through the website
    - It includes a feature called CED (Church Events Display). This feature allows for churches to integrate Church Hive directly into their website
  - [RylanWorkman.com](#)  
Built to display web services.

- **Service Engineer**
  - Self-initiator developing individual services in use by multiple users including:
    - Password manager that properly encrypts password information for users
    - File manager for sharing files
    - Admin Panels
